SUMMARY

Full Stack Developer with 1.5+ years of experience building enterprise Healthcare & Insurance applications using Java, Spring Boot, React, PostgreSQL, and REST APIs. Skilled in designing scalable backend services, responsive UIs, and secure JWT-based authentication systems. Hands-on with CI/CD pipelines using GitHub Actions and Docker for containerized deployments. Passionate about writing clean, production-ready code and improving engineering practices through Agile workflows.

CORE COMPETENCIES

- Languages: Java, JavaScript, TypeScript, SQL
- Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, Redis, Node.js, Express.js
- Frontend: React.js, Next.js
- Databases: PostgreSQL, MySQL, MongoDB
- Cloud & DevOps: Docker, GitHub Actions, AWS EC2, CI/CD
- Tools: Git, GitHub, Azure Repos, Maven, Postman, JUnit, Mockito
- Practices: JWT Authentication, OOP, Design Patterns, Agile/Scrum

PROFESSIONAL EXPERIENCE

HEXAWARE TECHNOLOGIES.

Software Engineer - I

Mumbai, IN
DEC, 2024-Present

- Developed and maintained enterprise-grade microservices-based Healthcare & Insurance applications using **Java, React, PostgreSQL, Spring Boot, and RESTful APIs**, contributing to multiple business modules and production releases.
- Built and enhanced **RESTful APIs** supporting business-critical workflows, integrating frontend and backend systems with secure authentication and efficient data exchange.
- Developed reusable and responsive **React** components, improving UI consistency, maintainability, and application usability across multiple screens.
- Designed and optimized PostgreSQL queries, stored procedures, and database operations for a high-volume financial application, efficiently processing **5+ million database records per month** for **5,000+ users** while supporting **₹15+ crore in monthly financial transactions**.
- Debugged production issues, performed code reviews, resolved application defects, and collaborated with cross-functional teams to deliver stable software releases.
- Collaborated in Agile/Scrum teams using **Azure Repos**, Git, Postman, and SDLC best practices, participating in code reviews, sprint planning, feature development, testing, and production deployments

PROJECTS

INTERFLOW | AI-POWERED INTERNSHIP & WORKFORCE ONBOARDING PLATFORM

JUN, 2026

Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, AWS, Groq AI

GitHub Link: <https://github.com/mrjayrai/intern>

- Architected a full-stack SaaS platform comprising **8+ business modules**, implementing JWT authentication, RBAC, audit logging, and automated onboarding workflows.
- Developed secure RESTful APIs with JWT authentication, RBAC, audit logging, email automation, and SLA-based workflow management using Node.js and Express.
- Integrated AI-powered resume parsing and candidate evaluation using **Groq LLM** to automate skill extraction, candidate scoring, and recruitment insights.

Tech Stack: React, Next.js, Node.js, Express.js, MongoDB, Python, Flask

GitHub Link: <https://github.com/mrjayrai/Intelliconsult>

- Built a full-stack consultant management platform with authentication, resume, training, opportunity, and attendance modules.
- Developed RESTful APIs using Node.js and Express, integrating MongoDB for efficient data management.
- Implemented AI-based resume parsing, skill extraction, and attendance analytics using Python, Flask, and NLP.
- Designed responsive React dashboards with role-based access and seamless frontend-backend integration.

CERTIFICATION

- Certification: [AWS Certified Developer – Associate](#)

EDUCATION

K.D.K COLLEGE OF ENGINEERING

Bachelor of Technology in Information Technology

Nagpur, IN

JAN,2021-JUL,2024
