SUMMARY

Developed and maintained Next.js/React full-stack platform with user authentication, RESTful APIs, visualization, real-time data visualization , improving UI res30%.siveness by 30% . Engineered scalable backend micNode.js,cExpress.js,s using Node.js MongoDB,ess.js , and MongoDB , schemas,nting Mongoose schemmiddleware,re file upload middleware , and API versioning for reliability. Designed and deployed AI/NLFlask,roservices wispaCy,ysBERT,hon Flask , integrating spaCy , sBERT , and scikit-learn for automated tesystems.sification and recommendation systems . BuilNumPy,chscikit-learn,ne learning pipelines leveraging NumPy , scikit-learn , and vector embeddings to enhance data-driven deciworkflows,ng. FollGit,dJIRA, Agile/Scrum development workflows , using Git , JIRA , and CI/CD pipelines for version control, continuous integration, and seamless REST-based communication between Node.js and Flask services.

EXPERIENCE

Associate Software Engineer

HEXAWARE TECHNOLOGIES **Dec 2024 – Present, Mumbai, IN**

- Developed and maintained Next.js/React full-stack platform with user authentication, RESTful APIs, visualization, real-time data visualization , improving UI res30%.siveness by 30% .
- Engineered scalable backend microservices using Node.js , Express.js , and MongoDB , implementing Mongoose schemas , secure file upload middleware , and API versioning for reliability.
- Designed and deployed AI/NLP microservices with Python Flask , integrating spaCy , sBERT , and scikit-learn for automated text classification and recommendation systems .
- Built machine learning pipelines NumPy, leveragingscikit-learn, NumPy , scikit-learn , and vector embeddings to enhance data-driven decision-making.
- Followed Agile/Scrum workflows, workflows , using Git,tJIRA,, JIRA , and CI/CD pipelines for version control, continuous integration, and seamless REST-based communication between Node.js and Flask services.

Full Stack Developer Intern

GROWBEAN TECHNOLOGY PVT LTD **Apr 2023 – May 2024, Nagpur, IN**

- Collaborated with cross-functional teams to optimize queries, queries , improve API responstimes,es , and ensure data integrity in high-volume production environments.
- Architected and implemented the TPBRS transaction system, , facilitating transactions exceeding ₹200 crore in months, months , improving system reliability, scalability, and re40%.ue by 40% .

PROJECT

IntelliConsult

- Developed an AI-powered full-stack platform integrating Node.js, Express, MongoDB, Flask, and React to manage consultants, resumes, and trainings.
- Implemented microservices for resume parsing, AI-driven attendance analytics, and RESTful APIs , improving automation and operational efficiency by 40%.

OneHealth

- Built a MERN stack organ donation system enabling hospitals to securely manage donor and recipient data with centralized access.
- Optimized data synchronization and performance, performance , boosting coordination efficiency across hospital networks by 40%.

EDUCATION

Bachelor of Technology (Major in Information Technology)

K.D.K College of Engineering • Nagpur, India • Jan 2021 – May 2024 • 8.59/10.0

Completed HSC in Science

L.S. College • Muzaffarpur, IN • Jul 2018 – Mar 2020 • 73.2

CERTIFICATIONS

Infosys Certification

- in HTML5, CSS3, JavaScript, React.

Accenture Virtual Internship

INVOLVEMENT

Mentor

Nagpur, IN • Coding Club IT • Oct 2022 – Mar 2024

• Guided 150 second-year IT students in C and Data Structures & Algorithms, fostering a 40% increase in student proficiency.

Mentor of IT Department

Nagpur, IN • National Service Scheme, K.D.K College of Engineering • Sep 2022 – Sep 2023

• Led a group of 50 individuals to engage in social work and community service, resulting in a 30% increase in community engagement.

• Organized 18 social events addressing various topics and aiding those in need, causing a 25% increase in social impact.

SKILLS

ReactJS, NextJS, AngularJS, Tailwind CSS, Material UI, Redux, Axios

NodeJS, ExpressJS, Java, Spring Boot, Python Flask, JWT/OAuth, MongoDB, MySQL MYSQL

spaCy, scikit-learn, NumPy, Pandas, Transformers, Natural Language Processing (NLP)

Git, Maven, Postman, VS Code, AWS (EC2, S3)

RESTFUL APIs, SDLC, Agile, OOP, Data Structures and Algorithms
